Dr. Walensky,

Please find the attached slide deck presentation and report focused on how CDC can better translate science and data into actionable policy and communications during a public health emergency. As discussed, these materials are being provided as part of an overall assessment of the CDC to inform its future direction and role in public health. (b)(5)

(b)(5)

I hope you find these materials helpful and would welcome your feedback, especially on the recommendations. I am also available to further discuss any areas in the report and/or address any questions that you may have.

Thanks!

Jim Macrae
